 - ✓ Primary client is Julius Berger Nigeria Plc
 - ✓ Member of all major associations in Nigeria, within the field of its activities
 - ✓ Complies with the Nigeria Oil and Gas Industry Content Development Act
-

OUR COMPANY

PRIMETECH Design and Engineering Nigeria Ltd. works in compliance with the Nigerian Oil and Gas Industry Content Development Act to provide a single point of contact for design and engineering of construction projects in the oil and gas industry.

Our company is equipped with the necessary hardware and software to provide (pre-)feasibility studies, front end engineering design (FEED), as well as detailed engineering and technical services that accompany design phases and aspects. Our capacity is further increased by our ability to tap into the vast resources and special expert knowledge on developing trends and latest technologies, through the technology transfer provided by Julius Berger and its international partners.

OUR MISSION

Our mission is to provide reliable, innovative, and efficient design and engineering solutions. We aim to consistently deliver superior quality services, on time, within budget, and to the full satisfaction of our clients. We are committed to securing the success of our clients through excellence and value in all services provided.

OUR VISION

Our vision is not only to maintain, but to continuously grow our capacities and competencies, in order to be the design and engineering team of choice for leading construction companies working in the Nigerian oil and gas industry, to the full satisfaction of all stakeholders. We invest in the long-term growth of our employees, in turn promoting the development of the country.

OUR PEOPLE

Our staff consists of structural, infrastructural, mechanical and electrical engineers, as well as architects. Our team members are committed to delivering superior quality, within the set parameters of any given project. Beyond the knowledge gained from experience on projects such as Bonny Island and Escravos, our staff improves on the high level of design and engineering performance through continuing education and training.

Our company provides a graduate development program to build up capacity and competence with high-potential candidates; furthermore we have set up a special mentoring program for our Nigerian engineers and architects, intended to maximize the benefits of on-the-job training.

OUR QUALITY STANDARDS

Our Quality Management System is certified to fulfill the requirements of ISO 9001, which ensures compliance to the highest standards of the oil and gas industry. In addition, strict conformity to applicable national and leading international standards assures delivery of superior quality design and engineering services.

As a method of internal control, our Quality Management System is routinely monitored and improved on by a team of committed and qualified personnel. Furthermore, in order to continuously enhance awareness of our processes and quality culture, training sessions are held on a regular basis, across all levels and functions within our company.
